Release Notes 2.2.3
October 18, 2004

The following items have been moved (migrated) to Production for use by Agencies beginning on October 18, 2004.

- A fix to multiple allotments edit. Users receiving error when attempting to enter ALOT-type deduction codes indicating that the routing number and account number already exist when this is not the case.

- A fix was made to the security tree update program to properly identify and update an OPDIV's security tree when only a change action has occurred. Previously, the security tree would only update an OPDIV security tree if a department was added. This was causing the department hierarchy not to display properly on the SF-50. The department hierarchy now prints correctly on the SF-50.

- A fix was made to the Auto WGI process so that it would not fail when processing GM employees.
